

Ministry Category: Government of Gujarat

Problem Statement: Mapping of crime against women

Team Leader Name: Ved Sengupta

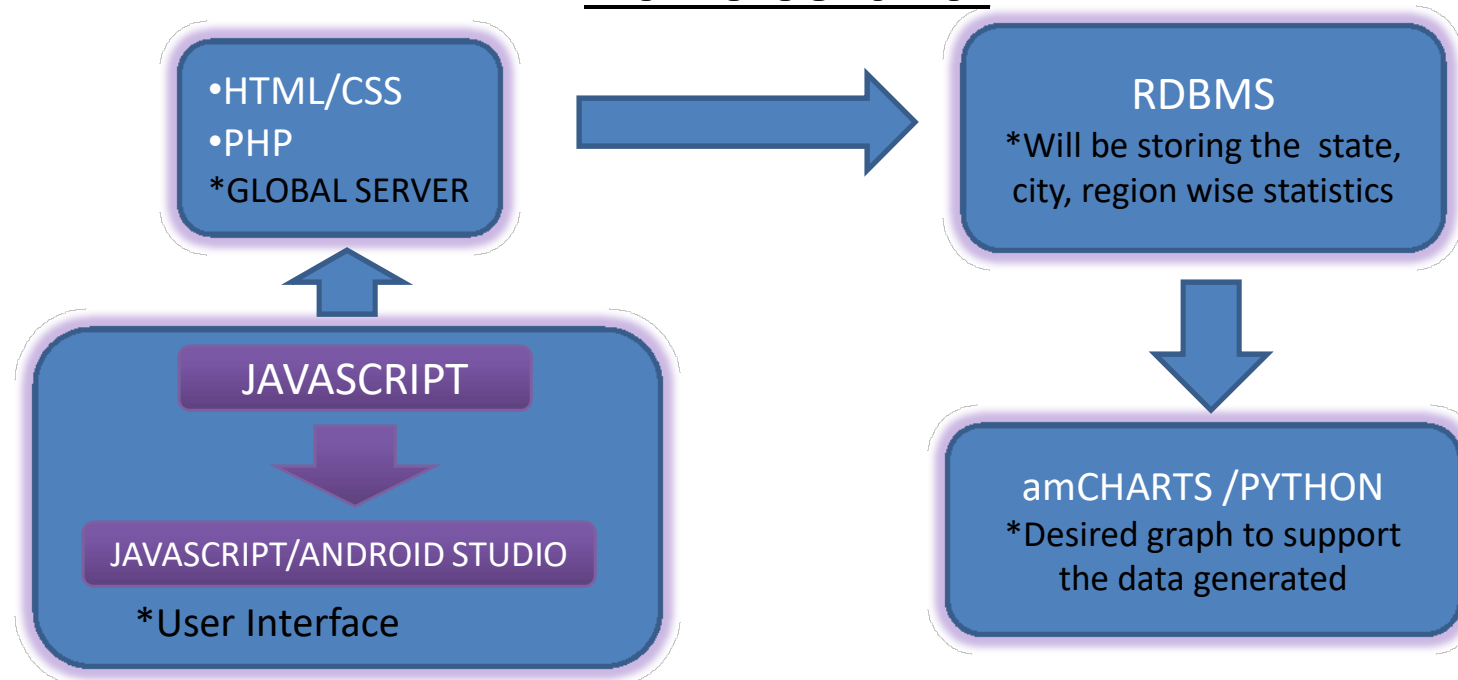

Problem Code: #GGJ38

College Code: 109

## APPROACH

We are aiming to create a responsive website accessible via an application which will gather statistics about the various types of crime against women in various areas across the country. There will be easy to use interactive windows which will direct the victim to enter the violation or crime conferred by her and the data will be stored in a global server which can be used by several government agencies to get area wise desired statistics. We can create graphical representation with the data we generate.

## TECHNOLOGY STACK

## USE CASE:

1. Select Location

2. Select Crime

3. Clarify if other

4. Respond to recommendation

## OUTPUT:

For our backend API structure visit : <https://github.com/kumarshivam12/demo2/issues/1>

AREA	Domestic Violence	Rape	Acid Attacks	Others
(-)West Bengal	150	120	50	10
(-)Kolkata	60	70	20	4
*Garia	10	20	8	2

## DEPENDENCIES:

- 1) Internet Access
- 2) NGO Support/ An authorized personnel( to file the crimes against the victims who cannot use / is not well acquainted with usage of gadgets )
